## **1.2 Challenges and Opportunities of Hostel Life**

Life is full of challenges and so does the hostel life. Every challenge also provides opportunity. The university faculty and students are encouraged to accept challenges to turn them into opportunities. The university community must consider challenges as blessings and should plan getting common benefits out of the opportunities. Every member of the university community should work together to tackle the challenges and get maximum benefits from the available opportunities and facilities. The following challenges and opportunities may be realized and used for common good and creating peaceful environment conducive to the wholesome development of each of the students.

- 1.2.1** Most ills in the universities particularly in hostels persist due to absence of challenge. So, not only the students' particularity those who are good in academic and score better grades should accept the challenge of challenging wrong in a decent and civilized manner. They should also encourage other fellows to develop the courage and strength to challenge, so that the system may be improve and cleaned. The university students should develop courage and strength to challenge the wrong and discriminating system provided they understand the difference. While challenging, the students should also promote dialogue, accept others point of view, uphold respect, principles of justice and fair play.
- 1.2.2** The students should appreciate the difference of opinion, as harmony is not something that you enforce by uniformity; it is something that emerges from the shades of diversity. As all human beings have due share in space but with limits; faculty, staff and students have right to space and liberty. They should exercise their right of space and liberty with highest degree of responsibility, as irresponsible action of any may go against some or all besides the institution. Behavior and dealing in a decent and civilized manner and displaying and practicing human values of highest level reflect the family traits which bring honour, respect and repute to the individuals, their family and the community.
- 1.2.3** Every student should try to get maximum benefit out of the hostel life. This can only be achieved only and only if the students plan their activities. SMART (Specific, Measurable, Achievable, Realistic and Time Bound) planning works. The students should give scientific outlook to their assignments. Students should keep focus to their studies and personal development, earn degree to carry it on their shoulders- as having degree in hand and briefcase is not graceful while carrying the degree on shoulders is respect and grace and guarantees bright future. Every student represents and reflects his/ her family, region and the institutions. It is their pleasant duty to glorify their family, region and institutions they

attended previously. The students should try to be as beneficial as they can for their families, society and the nation so that no one ignores them. The students should understand and realize the lesson the following proverbs carry;

Knowledge is the function of being; For the beautiful word begets the beautiful deed; Fire Begets Ashes; Like dissolves Like and Man is known by the company he keeps.

- 1.2.4** Be aware students! Anyone who instigates fellow students to take law into hands, damaging property, interrupting academic activities, boycotting examinations, insulting teachers, forcing fellow students for disobedience or any action which results hindering academic functions and causing troubles to teachers, staff, students and public, it is for the gain of some individuals or the group.
- 1.2.5** In the civilized countries, the traits of living with others are additional attributes, beneficial for the society and the nation. Leading by example, observing and practicing norms and rules of hostel are the important attributes, the boarder students should carry to learning and developing together. As learning to living with students of diverse culture and regions help promote national integration, love for all and respect for the nation state. Living with others may be as good as one can think; it may be a wonderful experience one may have or different and even unpleasant, mostly depends on the individual. Usually living in hostel is memorable and cheerishable provided one uses it for personal growth and helping others for theirs; caring and respecting the rights of others.
- 1.2.6** Who is responsible of making the Universities/ hostels, non-livable? Of course, universities themselves and students. Students are more sufferer and losers. No one protect them unless they do for themselves- not an easy adventure but challenging, yet do able. So boarder students are to bell the cat and take the bull by horns.
- 1.2.7** Rogue elements in the universities and criminals outside the University may trap innocent boarder students and used them to blackmail administration to harvest their benefits. This may include business of drugs etc and to meet political ends. So, the boarder students should be careful about the tactics of the ‘enemies of the youth and education’ of using them as instrument to getting their end served.

### **1.3 Role and Responsibilities of Boarder Students**

Every human being sent to life is to play his/ her role in this world. The community life demands a defined and limited role with the utmost responsibility. The boarder students are invited to play their role for making the university community life as product as possible, so that every member of the community may be considered as blessing for each other and contribute towards wholesome development of all the members. The students are required to realize the following in the national interest and more to their favour.

- 1.3.1 It is obligatory on students of the MUST to hold their Alma Mater Motto - Wisdom and Virtue. The students are also required to pursue the MUST Process – MUST Debate, MUST Dialogue and MUST Connect for fraternity and national integration to promote peace in the society. The students should realize and understand that time flies and who so ever utilized time judicially succeeded and also realize that who so ever stay without development for a day, he/ she will be behind by 86400 seconds and therefore cannot catchup those who are one day ahead.**
- 1.3.2** It is admitted fact that wise were and are those who spent available time and opportunity for their professional development. Respect for fellow students, discipline rules and above all teachers and institution makes the students superior. More Superiors the student will be if he/ she is humble. Do understand that your parents and family have high hopes of you so does the society and the nation. Do not let the hopes dies. The students must hold unity and consider them part of the whole and should take pride in nationhood. The boarder should observe and practice human values of highest level. They must consider themselves as the most respectable and civilized citizen of the country. They must know the difference and price of ignorance; very high and unaffordable.
- 1.3.3** At present, the hostels which should have been considered as blessing for knowledge seekers are proved otherwise and instead of building spirit of goodwill and human values they used to acquire strength from the weaks and navies for the clever and comparatively non serious students. Hostels of universities may be improved to the level that each of the boarder students enjoys the available facility for their professional development including human values; appreciating others point of view, respect for dialogues and courage and strength of right challenges.
- 1.3.4** The mass of the students should take lead and come forward to change the concept of hostel life. Most students like and appreciates discipline and only few support indiscipline and non-

conducive environment for their personal or group benefits but they don't know that their behavior and conduct is not, not at all, in their favour and it amounts to destroying the life of others for which they cannot be set free. Therefore, the University community should join to make the University a peaceful, pleasant and productive place to keeping the premises free from any troubles and discivilized activities.

- 1.3.5** Having degree is one thing and processing degree with proper grooming and having presentation skills is another and most important thing. The students should also groom themselves so that the university graduates may be known as properly groomed professionals having presentation skills and human values of highest level. As wholesome development includes education, presentation and human values. The faculty and staff should take the responsibility of grooming and polishing the students, so that they may be able to respect themselves in a dignified manner and considered as useful member of the society.
- 1.3.6** The faculty and staff should practice human values of highest level and exercise tolerance and inculcate the same in the students. We must understand and realize that extremism destroys families and societies. The university community should develop strength and courage to accept the opposite point of view and learn that every issue/ problem has many solutions. The most suitable solution is that which holds rule, promote peace and harmony in the community and institution.

### **1.6.1 Roommates**

Having to share your bedroom and living space with someone is often an adjustment. Our best advice is to:

- (a) spend plenty of time getting to know your roommate(s) during the first few weeks,
- (b) talk to each other about the limits for your shared living space, and
- (c) chalk out a roommate agreement.

There are four ways to ensure that roommates have a positive and successful relationship with one another i.e. through '*Communication, Consideration, Compromise and Co-operation*'.

**1.6.1.1** ***Communication*** entails talking and listing to your roommate(s), especially about issues that will affect your relationship (e.g. borrowing items/ lights on off/ study books/ notes/ money. It is wise to talk out any concerns or conflicts as early as possible.

**1.6.1.2** ***Consideration*** is another handy attribute for living with other people. The best way to be considerate is to think before you act. Ask yourself how your actions might affect others. Most conflicts occur due to lack of considerations, but remember these conflicts can be resolved through communication!

**1.6.1.3** ***Compromise*** is the foundation of any healthy relationship. If your roommate likes to go to bed *early* to get up early and you prefer to sleep late and get up late, a little give and take can be remedy to the situation. Simple compromises can make a tremendous difference.

**1.6.1.4** ***Co-operation*** involves roommates working together towards a common goal. It may be something as simple as making sure that the garbage isn't overflowing. When roommates agree on common goals all roommates can work towards ensuring that the goals are met.

### **1.6.2 The Surrounding Community**
